Whose Thoughts Are They, Anyway? Dimensionally Exploding Bion's "Double-Headed Arrow" into Coadapting, Transitional Space

A. H. Stein

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 65-92

Book Review *A Review of Self-Organization of Complex Systems: From Individual to Collective Dynamics*. Edited by Frank Schweitzer. 1997. Gordon & Breach. 596 p. + xxiv.

Elliott Middleton

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 119-125

Modeling Historical Development: Fitting a Competing Practices System to Coded Archival Data

David K. Dirlam, Karen L. Gamble, Heidi S. Lloyd

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 93-111

Estimation of Correlation Dimension to Evaluate Cognitive Performance in Schizophrenic Patients Using a New Computer Technique

Roberto Hornero, Alonso Alonso, Natalia Jimeno, Agust n Jimeno, more

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 49-63

Modeling Human Motor Systems in Nonlinear Dynamics: Intentionality and Discrete Movement Behaviors

Keith Davids, Chris Button, Simon Bennett

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 3-30

Book Review *Chaos and Complexity: Implications for Psychological Theory and Practice*. By Michael B tz. Taylor & Francis, 1997; 271 pages, index, \$54.95 USD hardback, \$24.95 USD...

Allan Combs

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 113-118

Corrections to "Symbolic Dynamic Patterns of Verbal Exchange in a Creative Problem Solving Group"

Stephen J. Guastello

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 127-128

Confidence Judgments for Discriminations in Nonlinear Psychophysics

Robert A. M. Gregson

Nonlinear Dynamics, Psychology, and Life Sciences > 1999 > 3 > 1 > 31-47

Book Review *Chaotic Cognition: Principles and Applications*. By Ronald Finke and Jonathan Bettle. Mahwah, NJ: Lawrence Erlbaum Associates, 1996, 229 pages

Mark L. Rieke

Discrimination is when a person is treated unfairly or badly because the person is one of a particular group. The Universal Declaration of Human Rights affirms that all persons must be protected against any kind of discrimination, or even its inciting. Discrimination can take many forms. It can include being fired from a job, not being able to be hired for a job, being paid less money than others at the same job, being refused a home or apartment, teasing, harassment, or simply being treated differently than other people. Laws known as "equal opportunity legislation" protect people from discrimination. They say people should be employed whatever their race, age, sex or religion. There should be reasonable care for people with disabilities or accessibility. Would we see discrimination in the job market? A researcher sent pairs of college men to apply for 350 entry-level jobs in Milwaukee, Wisconsin. One team was African American, and one was White. The teams had identical resumes, except for one difference—on each team, one of the men said that they had served 18 months in jail for drug possession. Guess what the results were? This does not mean that the dominant group is the majority group in terms of numbers. A small dominant group can still hold power over the majority. Since it is a social media platform, it can offer nuanced gender identification categories. In a census survey however, it would be difficult to achieve the same. List of all the different types of third gender categories.
